Important: Read the entire instruction before starting the assembly. Strictly follow all the instructions provided in this manual and carry out all of the stages of the installation process in the specified order. Failure to comply with these rules may lead to incorrect fitting of the decorative laths and the occurrence of visual defects. The warranty certificate is void if it is found that damage has been caused by incorrect installation. The base on which the product is to be installed must be flat and without significant differences in level. The product must be attached to the base. Note: Use lube for all screws to prevent them from breaking. Make sure that the pallet cannot tipp over and cause accidents. Make sure that the ground were you put the pallet is in level. Installing two ground spikes to the pallet will prevent it from tipping. Do not remove all the wooden rules inside the pallet. Only remove the ones that are necessary to access the part you need.

Installation requires at least 2 people.

Necessary tools – rubber mallet, measuring tape, spirit level, screwdriver PZ2, wrenches 10/13/17 mm, cordless drill, 3 mm hex key, utility knife, *soap for rubber when oil is not enough, silicone gun and silicone, ladder.

BEFORE INSTALLATION

make sure the foundation is solid and stable and matches the dimensions of your pergola - the foundation should be larger than the pergola foot/base plate.

CLASSIFICATION OF PARTS

			120x120	120x160	120x200	120x238	160x106	160x200	160x238
	Part name	Size (inch)							
	A1 (corner beam)	98,43	4	4	4	4	4	4	4
	A2 (middle beam)	98,43							
	B1 (opening mechanism side)	118,5	1						
	B2 (for 120x...)	118,5	2	2	2	2			
	B3 (other side)	118,5	1						
	B4 (opening mechanism side)	157,87		1			1		
	B5 (other side)	157,87		1			1		
	B6 (for 160x...)	157,87					2	2	2

1

Choose the location of the opening mechanism

Install opening mechanism and secure with screws

Use a 0.118" spacer to adjust the spacing

Install vertical profiles

Tighten the screws securing the vertical profiles

**Level the pergola structure.
Use spacers if necessary.**

**Countersunk expansion plug with screw.
Drill holes in the foundation and secure the pergola feet.**

Opening mechanism cover

Corner top cover

M6x12

Install vertical profiles

Screw the opening mechanism control shaft into the roof profile

C1 = 118.110"
C2 = 157.480"

Screw in the bolt with washers on the other side of the profile

Use a 0.118" spacer to adjust the spacing

Insert the louver blade profile

Fit the rubber seal onto all the louver profiles

Screw in the screws at both ends of the profile, leaving a 0.118" gap

Insert the remaining louver profiles

**Install the pergola louver
guide rods on both sides**

**Do not overtighten -
it should move freely!**

Use the removable operating handle to open and close the pergola
